

3rd Cryo-EM user forum 2021

Save the date

Dear interested cryo-EM users,

We want to continue the cryo-EM user forum. Therefore I want you to save the date **7th and 8th September 2021**.

This year`s program will contain news and discussions about your projects and the StruBiTEM facility. We hopefully can win some guest speakers to give a talk about their success story “from the idea to the publication”.

To encourage scientific discussions, we will have a poster session and project work to different topics concerning cryo-EM.

The user forum will be a Zoom session this year.
Detailed information about the program will follow soon.

If you want to participate, please send an email to strubitem-contact@uni-koeln.de until June 30th
subject line: Cryo-EM user forum 2021

In the last years, we offered a pre-course that gives an overview about the single particle workflow and concepts that come up in this workflow. If you are new in the field and if you are interested in such a pre-course, give me a note in the email.

We will just offer this pre-course, if there is enough interest in that.

I hope to welcome you at the 3rd Cryo-EM user forum 2021.

Monika Gunkel
